Figures

1-1 Trends in US, Private Sector Pension Plans (number of plans by type).	3
2-1 Probability of a short of a shortfall insurance.	22
2-2 How long will \$1 million last?	26
2-4 Rate of return on New York Stock Exchange.	27
2-5 Funds remaining for retiree who started withdrawing 1973.	27
3-1 Participant knowledge about risk/return of company stock.	52
3-2 Wealth outcomes and company stock.	55
4-1 Portfolio efficient frontier.	75
4-2 Exchange option value (1 year)	85
4-3 Exchange option value (3 year).	85
5-1 Expected annuity income paths.	96
5-2 Expected total income paths with pension guarantee.	96
5-3 Expected total income paths with universal pension.	99
6-1 Investment payoffs over 100 random trials (ordered): (a) 10-year horizon, (b) 30-year horizon.	104
6-2 Investment payoff paths for equities versus treasuries: 30 year horizon.	105
7-1 History of the fiscal investment and loan program	130
7-2 Portfolio of PWSPC, 1998.	131
7-3 Gross pension fund returns minus T-bill rates, Japan, 1970-97.	131
7-4 Accountability of government and public pension fund returns.	146
8-1 Guarantee payments as a function of the IA Value.	162
8-2 Annual returns for US Stock and Bond Markets, 1942-2000.	165
8-3 The effect of longer time horizons on the Volatility of Stock returns.	166
9-1 Expected compounded return of saving plans in stocks and bonds.	193
9-2 Shortfall probability against a (nominal) zero percent target rate of return in stock and bond saving plans.	193
9-3 Conditional mean expected loss (MEL) against a (nominal) zero percent target rate of return in stock and bond saving plans.	194
9-4 Expected shortfall against a (nominal) zero percent target rate of return in stock and bond saving plans.	195
10-1 (a) The profit and loss distribution for unhedged segregated fund guarantees that offer no resets and two resets per annum. (b) The return on investment for a 95% CTE capital requirement for unhedged segregated fund guarantees which offer no resets and two resets per annum.	220
10-2 Comparison of the return on investment for a hedged position versus an unhedged segregated fund guarantee which offers two resets per annum.	228
10-3 The profit and loss distribution. A segregated fund guarantee which offers two resets per annum when hedging using an asset which has correlation ρ with the underlying mutual fund	233
13-1 Basic ABS structure.	273
13-2 Credit-linked note.	276
13-3 Pure catastrophe bond.	279
13-4 CatBond with SPR.	280
